# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

High pressure overhead will prolong dry weather and above normal temperatures for interior locations for one more day. Coastal temperatures will remain more seasonal with morning clouds and afternoon clearing. A pattern change will develop this weekend bringing seasonal temperatures back to northern California through early next week.

#### **Medford Weather:**

The hottest day of the unseasonably warm stretch will be today as the thermal trough on the coast moves inland. A cold front arrives Sunday as the upper trough deepens over the Pacific Northwest. Instability remains ahead of the front, but with increased cloud cover ahead of the front have kept the chances of thunder to just slight chance.

#### **Reno Weather:**

Very warm afternoons with dry conditions will persist through Saturday. Areas of smoke and haze from fires on the west slope of the Sierra will continue to affect the eastern Sierra into the weekend. Temperatures will cool next week with breezy conditions likely Monday as low pressure develops off the Pacific Northwest coast.

#### **San Francisco Weather:**

Very warm and dry weather conditions will continue today as the upper level ridge remains over the state. A gradual cooling trend will begin on Saturday as the ridge weakens and increased moisture from the south moves into the area. In addition, there is a slight chance of thunderstorms over the southern portion of the district on Saturday night and Sunday.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### **Sacramento Weather:**

Record or near record temperatures again today. A slight cooling over the weekend is predicted into next week. A threat of afternoon or evening thunderstorms expected over the mountains Saturday through Monday. There will be a slight chance of light precipitation coast range and northern areas around the end of next week.

#### **Hanford Weather:**

Strong high pressure will remain over Central California today with well above normal temperatures continuing. Temperatures will trend cooler this weekend and into early next week. Sub-tropical moisture will provide a chance of afternoon showers and thunderstorms over the mountains and desert through Sunday.

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

Remnants of former Hurricane Linda will bring a slight chance of thunderstorms to the Los Angeles and Ventura County mountains northeast to the Antelope Valley through Sunday. Temperatures are expected to drop to near normal by Monday as a trough of low pressure approaches.

#### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

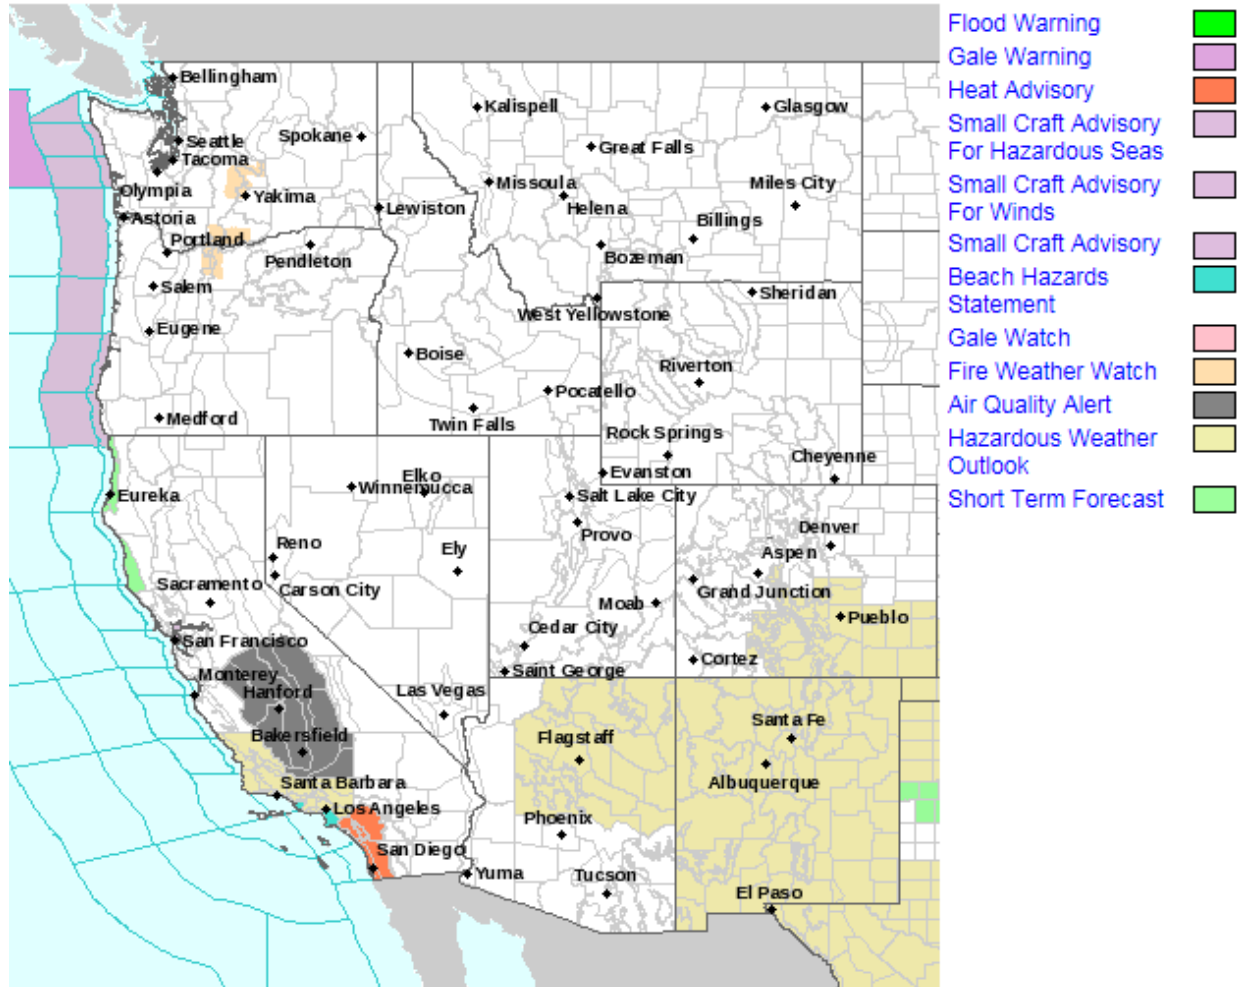

Monsoon moisture will bring scattered showers and thunderstorms to the inland valley, mountains, and deserts this afternoon. Moisture will decrease gradually over the weekend and onshore flow will gradually increase resulting in the thunderstorms being more restricted to the mountains and deserts, along with a slow cooling trend. Much cooler with increasing marine layer clouds for the early to middle part of next week as a trough digs along the west coast. Warmer towards the end of next week as high pressure rebuilds.

#### **Southeast California Weather:**

A shift to a more northerly flow aloft is expected produce lower humidities reducing thunderstorm chances today and Saturday. From Sunday through the middle of next week, the combination of approaching Pacific disturbances and a return of monsoon moisture will increase the chances for showers and thunderstorms.
